

Stock Market Portfolio Dashboard

PROJECT DOCUMENTATION

An interactive Excel dashboard to track, analyze and visualize stock portfolio performance

PROJECT OBJECTIVE

Build an Excel-based stock portfolio management dashboard that tracks buy/sell transactions, analyzes investment performance, and provides interactive filtering using slicers for data-driven decisions.

DATASET OVERVIEW

- Source:** Personal stock transaction records
- Fields:** Date, Symbol, Sector, Broker, Buy/Sell, Quantity, Price
- Time Period:** Feb 2026 – Jul 2026
- Coverage:** 5 stocks across 4 sectors, 2 brokers

KEY KPIS

Portfolio Value ₹87,634	Total Invested ₹1,04,250
Total Gain/Loss -₹16,616	Holdings 15
Total Return % -26.10%	Stock Count 5
Transaction Value ₹41,860	Best Performer ADANIPORTS (103.16%)

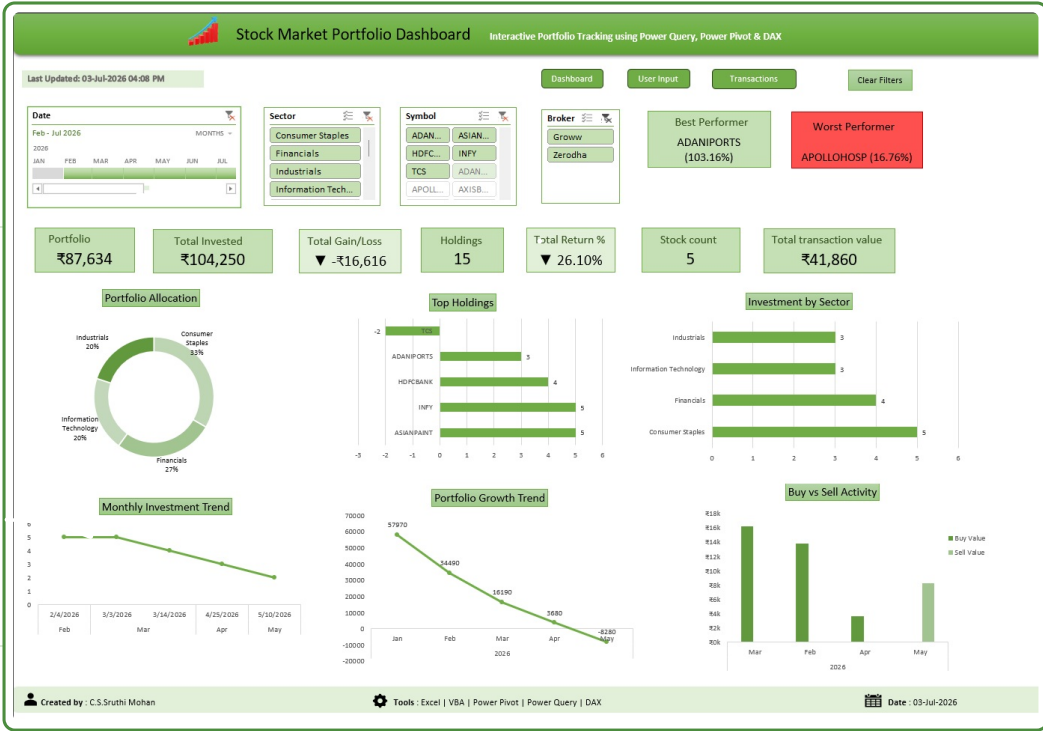

TOOLS USED

- Microsoft Excel
- Power Query
- Power Pivot & DAX
- Pivot Tables & Pivot Charts
- VBA Macros
- Data Validation & Conditional Formatting

EXCEL SKILLS USED

- Data Cleaning
- Data Modeling
- Pivot Tables/Charts
- Slicers
- DAX Measures
- VBA Automation
- Dashboard Design
- Conditional Formatting

DASHBOARD PREVIEW

DASHBOARD FEATURES

- ✓ Interactive dashboard with slicers for Date, Sector, Symbol & Broker
- ✓ Dynamic KPI cards for real-time portfolio metrics
- ✓ Portfolio allocation breakdown by sector (donut chart)
- ✓ Top holdings and sector-wise investment bar charts
- ✓ Monthly investment trend and portfolio growth trend lines
- ✓ Buy vs Sell activity comparison chart
- ✓ Best & worst performer highlight cards
- ✓ Transaction entry form built using VBA

PROJECT WORKFLOW

KEY INSIGHTS

- Portfolio currently shows an overall return of **-26.10%**, with unrealized losses outweighing gains.
- Consumer Staples and Financials together make up **60%** of total sector allocation.
- ADANIPORTS is the top performer at **+103.16%**, while APOLLOHOSP is the weakest at **-16.76%**.
- Buy activity consistently outpaces sell activity across the tracked months.

CONCLUSION

This dashboard provides a clear, interactive view of portfolio performance across sectors, brokers, and individual stocks. It streamlines transaction tracking and enables faster, data-driven investment decisions through real-time KPIs and visual trend analysis.
